

2008 CE-Pro Magazine Top-100 Custom Integrators Survey

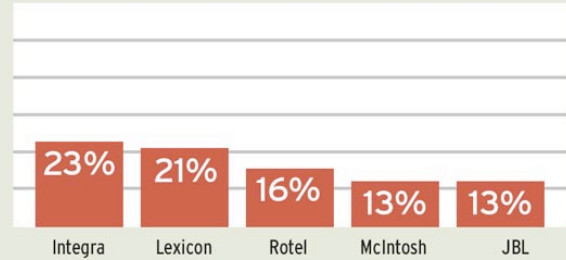

A/V Receivers

Picking up 16 more dealers to become the list's most widely used A/V receiver this year is Integra. Falling to second place and third place, respectively (each adding two more dealers), is Denon and Marantz.

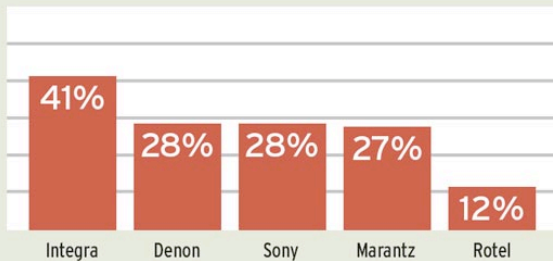

Home Theater Amplifiers

Integra, along with Lexicon, continues its strong showing in the audio categories. McIntosh and Rotel also remain consistent, both returning to the top five. Just missing the top five were JBL Synthesis and Krell.

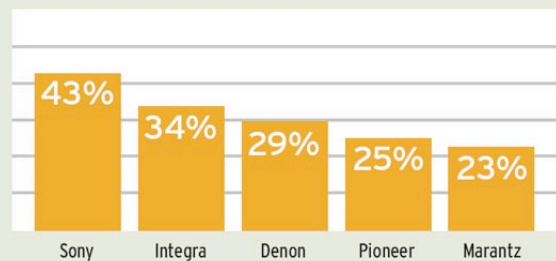

CD Players

The CD player category is one in which Integra increased its numbers with the *CE Pro 100*. Following Integra are Denon and Sony with 28 and Marantz with 27. In 2007, the rankings were much closer in this category, with Sony way ahead.

DVD Players

Leading the way in the DVD category is Sony. After Sony, there is a lot of competition between Integra, Denon, Pioneer and Marantz. Looking ahead, it will be interesting to see how Blu-ray impacts installer DVD player sales.

Integra is the #1 Choice with top custom integrators
